

Proven[®]
SEED

XCEED[®] X121CL

Growing *Brassica napus* canola in the brown and dark brown soil zones of the Prairies comes with a higher degree of risk than present in other soil zones. Higher temperatures and drier conditions can lead to low yields and poor grain quality. XCEED[®] X121 CL canola has been bred by Proven[®] Seed specifically for the brown and dark brown soil zones to better tolerate heat and drought for consistent performance, reduced green seed, improved seed quality and higher yield potential. X121 CL has improved pod shatter resistance for better straight-cut performance.

HIGHLIGHTS

- Improved heat and drought tolerance for brown and dark brown soil zones
- Pod shatter resistance for straight cutting option
- Eligible for non GMO contract incentives
- Strong standability
- Clearfield[®] production system for resistance management and crop rotation management

YIELD	125% of VT Oasis CL
DISEASE PACKAGE	R rating for blackleg; R rating for fusarium wilt
STANDABILITY	Strong rating of 2.2
DAYS TO MATURITY	98 days
HEIGHT	116 cm

Source: 2014 CPS Local Performance Checks – 15 trials across Western Canada
Standability rating: 1 – 5, 5 = flat

PRODUCT INFORMATION

- Helix[®] Vibrance[®] seed treatment provides the insect and disease control package
- Contact your local CPS retail for pricing and programming
