

VR9561GS

Sclerotinia steals profits from western Canadian canola growers. VR 9561 GS with the Pioneer Protector® sclerotinia resistance trait, provides the first line of defense in sclerotinia management plus blackleg and fusarium wilt resistance. An effective sclerotinia management strategy includes selecting a resistant variety and planning for an in-season fungicide application.

HIGHLIGHTS

- Comprehensive disease package including built-in sclerotinia resistance
- Genuity® Roundup Ready® production system
- Early maturity

YIELD	97% of PV 530 G
DISEASE PACKAGE	R rating for sclerotinia, blackleg and fusarium wilt
