

CWRS

CDC Morris

The pinnacle of yield performance and FHB resistance, CDC Morris is a high-yielding CWRS variety that places at the top of Proven Performance Check trials year after year. Great protein potential, heavy test weight and strong lodging resistance make CDC Morris an excellent choice for growers in high fertility areas.

Highlights

- Top performer in the Proven Performance Check trials
- High yield with excellent protein potential
- Wide disease resistance package including moderate resistance to FHB
- Excellent standability
- Well-suited for all Prairie regions

Local Performance Checks

Managed by the CPS Research & Development team, Local Performance Checks (LPCs) are used to provide data reference points for field agronomists and producers. Each site is small plots under a replicated protocol. All sites are seeded the same day and receive identical treatments of fertilizer, seed treatment, herbicides and fungicides.
