

SPREDOR5

Fifth generation creeping rooted alfalfa with extremely high winter survival

Geography, climate and cutting schedules all factor into selecting the right alfalfa for your situation. Spredor 5 is a creeping rooted variety well suited for grazing situations.

- Fall dormancy: 2.0
- Rooting type: Creeping Root
- Multifoliate: N/A

It is well adapted as a legume for pasture renovations and has been tested and proven to perform in salt-tolerance trials.

- Early fall dormancy and a very hardy winter survival rating
- Early seedling establishment, fast recovery after cutting and long stand persistence
- Drought and salt-tolerant for germination
- High leaf to stem ratio, excellent leaf retention and fine stems

Spredor 5 is featured in our Haymaster Ultimate, Beefmaster, Ranchmaster II, hps® Premium Alfalfa Blend, Legumaster, Seasonmaster and Equimaster II Master Blends.

Backed by the Proven Seed Performance Promise®

Invest in Proven Seed and have confidence your investment is protected by the industry's leading guarantee. The Proven Seed Performance Promise gives growers the opportunity to replant forage plantings at half of the original invoiced cost in the case of failure.

Coverage under the hps® brand

Developed for our forage seed products, the hps brand is the common seed line from Nutrien Ag Solutions. It provides forage growers with coverage under the best warranty in the industry and the same high-quality standards as our certified seed.

Quality assurance

When selecting seed lots for our forages, careful consideration is taken to ensure you have the highest level of success possible. Proven Seed forages, including Master Blends and hps-branded varieties, conform to the rigid purity standards of less than 10 weed seeds per 25g.
