NEW

PV11s001RR2

A SOLID DEFENSIVE PACKAGE

New PV 11s001 RR2 boasts early maturity in addition to strong and stable yields across multiple environments. This Genuity[®] Roundup Ready 2 Yield[®] soybean is well suited for wide and narrow-row planting. With strong agronomics and a disease package that ensures success including strong resistance to Phytophthora root rot and excellent tolerance to iron deficiency chlorosis, PV 11s001 RR2 is a great option for the early zones in Western Canada.

HIGHLIGHTS

- Aggressive early growth with exceptional emergence in stressful conditions
- Tall plant height with good standability and great appearance
- Well suited to tough growing conditions and wide row production

YIELD	105% of NSC Watson RR2Y
RELATIVE MATURITY	00.1 RM (2325 Heat Units)
DISEASE PACKAGE	Contains Rpsc1 Phytophthora gene with excellent field tolerance, excellent IDC tolerance and good white mold resistance
STANDABILITY	Very good
HEIGHT	Medium
