

VR9562GC

VR 9562 GC with the Pioneer Protector® clubroot resistance trait offers canola growers consistently high yield potential plus clubroot resistance. The most productive land – better fertility, better soil structure, better organic matter, fewer weeds – deserves this productive Genuity® Roundup Ready® canola hybrid.

HIGHLIGHTS

- Consistently high-yielding across all mid to long season zones
- Excellent standability for harvest ease
- Comprehensive disease package including built-in clubroot resistance
- Early maturity for a mid-season hybrid

YIELD	106% of PV 530 G
DISEASE PACKAGE	R rating for clubroot, blackleg and fusarium wilt
STANDABILITY	Excellent rating of 2.1
DAYS TO FLOWER	45.5 days; one day later than PV 530 G
DAYS TO MATURITY	91 days; comparable to PV 530 G (91.3 days)
HEIGHT	47.8 in; same as PV 530 G

Source: 2015/2016 Nutrien Ag Solutions Local Performance Checks – 31 trials across Western Canada, 22 sites, 93 replicates
LSD = 3.43% Standability rating: 1 – 5, 5 = flat
