

PV560GM

With built-in resistance to pod shatter and pod drop, PV 560 GM is powered by the Pioneer Protector® HarvestMax trait, making harvest decisions simpler. This Genuity® Roundup Ready® hybrid provides ultimate flexibility at harvest time and reduces the risk of harvest losses, resulting in higher yields and profits. PV 560 GM is a great harvest management tool for canola producers looking to manage fall workload and crop maturity timing.

HIGHLIGHTS

- High-yielding
- Allows for flexible swath timing for a wider window of harvesting
- Option to straight cut
- Reduces pod shatter to provide more seed in the bin and more profit
- Reduces volunteer canola for the next season

YIELD	104% of DK 75-65
DISEASE PACKAGE	MR rating for blackleg; R for fusarium wilt
STANDABILITY	Excellent rating of 1.7; similar to PV 540 G (1.9)
DAYS TO FLOWER	47.4 days; slightly earlier than PV 540 G (48.3 days)
DAYS TO MATURITY	+1.3
HEIGHT (cm)	+13

Source: 2019 Nutrien Ag Solutions Local Performance Checks – 30 trials across Western Canada, 10 locations, 30 replicates
Standability rating: 1 – 5, 5 = flat

PRODUCT INFORMATION

- Enhancement options include:
 - › Prosper® EverGol™ seed treatment
 - › Prosper EverGol seed treatment plus Lumiderm™ insecticide
- Contact your local Nutrien Ag Solutions retail for pricing and programming

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup Ready® technology contains genes that confer tolerance to glyphosate, an active ingredient in Roundup® brand agricultural herbicides. Agricultural herbicides containing glyphosate will kill crops that are not tolerant to glyphosate.
