

# PV585GC

The best offence is a great defense. As clubroot continues to spread across Western Canada, Proven® Seed leads the way with new and innovative disease management solutions. PV 585 GC is a Genuity® Roundup Ready®, multigenic clubroot resistant canola hybrid. It's the complete package, boasting superior resistance to both clubroot and blackleg, along with excellent agronomic traits and strong yields. Proven Seed's line of sustainable clubroot management options for existing and high-risk clubroot fields allows growers to protect their canola rotations and yields.

## HIGHLIGHTS

- Multigenic clubroot resistant hybrid
- Great standability
- Excellent alternative disease package for clubroot management
- Excellent blackleg resistance
